

GREENHILL ACADEMY SECONDARY
SENIOR FIVE TERM TWO 2026
GEOGRAPHY HOLIDAY WORK

The atmosphere in our communities influence a lot of human activities in given areas.

During this holiday, you have been tasked to help your local community use the atmosphere to improve on their way of life. To be successful, you need to explain the concept “atmosphere”, its main components, and the role of each component in influencing weather and climate.

You are also required to study a diagram illustrating the vertical structure (layers) of the atmosphere, explain the characteristics and influence of each layer on weather and life on Earth.

TASK

Write an essay you will present to your community clearly bringing out the concepts in the scenario and how these conditions influence human activities.
